What is the Leeds Care Record?
Leeds Care Record is a joined-up digital care record which enables clinical and care staff to view real-time health and care information across care providers and between different systems. It is a secure computer system that brings together certain important information about patients who have used services provided by their GP, at a local hospital, community healthcare, social services or mental health teams. All health records are strictly confidential and can only be accessed by clinical and care staff who are directly involved in a patient's care. Leeds Care Record holds certain information about a patient or service user, for example:

- Address and telephone numbers.
- A list of diagnosed conditions, to make sure your clinical and care staff have an accurate record of your care.
- Medication - so everyone treating you can see what medicines you have been prescribed.
- Allergies - to make sure you're not prescribed or given any medicines you can have an adverse reaction to.
- Test results - to speed up your treatment and care.
- Referrals, clinical letters and discharge information - to make sure the people caring for you have all the information they need about other treatment you are having elsewhere.
- Care plans - for clinical and care staff involved in your care to view a joined-up plan of care and the wishes you've asked for in relation to your care.

What are the benefits of Leeds Care Record?

- Joined-up and safer care.
- More time to spend on care.
- Less paperwork.
- Your information in one place.
- Don't have to repeat details to different clinical and care staff.

Who can see my Leeds Care Record?
Only clinical and care staff directly involved in your care will see your Leeds Care Record. We won’t share it with anyone who isn’t providing your treatment, care or support. Your details won’t be made public, passed on to a third party not directly involved in your care, or used for advertising.

How do I know my Leeds Care Record is secure?
Data is pulled from secure clinical systems across the city which is displayed in the Leeds Care Record and remains confidential.

Can I object to my Leeds Care Record being shared?
Yes. You have the right to object to your Leeds Care Record being shared by calling 0113 20 64102. However, if staff require access to the information shared on Leeds Care Record to provide safe individual care they are legally allowed access.

Any questions?
If you have any queries or would like to object to your Leeds Care Record being shared, please contact:

- Referrals, clinical letters and discharge information
- Care plans
- Contact details

Joined-up and safer care
Information in one place
More time to spend on your care
Secure and confidential

So, how does it work?

Scenario 1

Jamie is on a school trip in Leeds and has an allergic reaction. Parents can't be reached, Jamie is taken to hospital by ambulance.

The hospital care staff can access Leeds Care Record to see Jamie's medication and allergy history.

Scenario 2

Gladys visits her GP stating she is feeling unwell. Her GP is concerned and calls for an ambulance to take her to the hospital.

Arriving at A&E, the care staff review Gladys’s Leeds Care Record and investigate the cause of illness by taking some routine blood tests. Following the diagnosis, Gladys is transferred to a hospital ward. After spending a few days in hospital Gladys is discharged to recover at home.

Leeds Care Record provides clinical and care staff directly involved in your care access to the most up to date information about you.

It does this by sharing appropriate information from your health and care records between health and social care services in Leeds.
